WOOD SIGNS

Nothing has quite the distinction of a custom made wooden sign. TCI uses quality butcher block oak and black walnut to turn your design ideas into works of art. A computer driven router capable of accuracy to .001 of an inch cuts your sign which is then expertly detailed, finished, and custom painted to create a truly unique sign or plaque. TCI craftsman can work from your design or will work with you to create an original statement for your agency or organization.

***Call Customer Service for Ordering Information.**

GRAPHICS

SIGNFOAM

Signfoam is a rigid high density urethane material designed to replace wood and metal in sign applications. Completely waterproof and light weight, Signfoam will not crack, warp or delaminate and can be suspended or pole mounted with a minimum amount of support. Custom signs are finished using normal sign paints including lacquers not affected by solvents, producing an extremely durable maintenance free product.

***Call Customer Service for Ordering Information.**

3D GRAPHIC SIGNS

TCI's 3D Graphic Signs offer an "eggshell" or non-glare, matte finish that improves readability; a letter-to-background contrast of 70% or greater; and raised letters, numbers grade to Braille. Signs feature a "domed" Braille, preferred by the vision impaired community for its readability. We also offer an extensive range of design flexibility. Now your agency can create attractive images that compliment your design and decorating needs that will endure day-to-day treatment without losing their appeal. This solution is cost-competitive with other types of available ADA signage without sacrificing quality and attractiveness.

***Call Customer Service for Ordering Information.**

SIGNAGE

BRASS AND PLASTIC SIGNS

TCI offers a large selection of signs for your agency's needs. Signs are made for desks, doors, walls, or any other surface. They are constructed of polished brass or colored plastic. TCI offers a full line of colors, types of plastic, mounting materials and sizes to suit your agency's needs. All signage is produced to customer specifications. TCI will also customize any sign.

***Call Customer Service for Ordering Information.**

DESK NAME PLATES

TCI offers a large selection of desk name plates for your agency's needs. Two sizes of name plates are offered in many distinctive styles, materials and colors. TCI will also customize any desk name plate. Optional easels and mounting materials come in three styles made of natural oak, stained oak, or polished brass.

SIGNAGE

OmegaBond is our most requested substrate, which is a composite sheet of PVC sandwiched between aluminum that is rigid but lighter than traditional 40 mil or 80 mil aluminum.

80 mil aluminum is recommended for parking areas as it is a very rigid substrate that can withstand years of wear and tear.

40 mil aluminum is recommended for building signage or anywhere the composite board or heavy 80 mil aluminum wouldn't be prudent.

For a more temporary solution that is cost effective we recommend Corrugated Plastic. This is typically used with "H" stakes in lawns or with A-Frame sandwich frames.

We also offer expanded PVC as a substrate which is very lightweight and easy to handle. This is a good alternative for indoor signage where weight may be a concern.

GRAPHICS

FILE FOLDERS

TCI file folders are constructed with a 25pt fiber board for the green and rust and 20pt fiber board for the Executive Red fronts and backs. The inserts in our folders are made from 200 lbs. manila material. The fasteners on the covers are held in place with heat activated glue. The fasteners on the inserts are a dual type fastener that passes through the insert. All folders can be made to expand up to 2". Tabs, if desired, can be located to the left, right or center at your request.
